

Add Dynamic Dates

ACE Reports

April 2024

U.S. Customs and Border Protection

INTRODUCTION

Report query filters include options to refine the search parameters associated with it. These parameter options define the constraints of the data search for the data object and define how user input is entered when the query is run.

The values of date filter objects can be set using a constant value or user prompt value. However, these methods are inefficient for recurring scheduled reports where the date range needs to update for each instance. For these reports, a dynamic date range that automatically adjusts based on the report run date is available.

ADD DYNAMIC DATES TO A QUERY

- 1. Open a report that contains a date range.
- 2. Select the **Design** mode.
- 3. In **Design** mode, in the **Query** tab, select the **Edit** icon \blacksquare .

The Query Panel displays.

- 6. In the **Objects** dialog box:
 - a. If required, expand the Date Objects folder.
 - b. Select a date object.
 - c. Select the **OK** button.

7. Repeat Steps 5 and 6 for the second date field.

8. Select the Apply and Close button.
