

# ANSI X.12 Truck Manifest Implementation Guide

309 Customs Manifest

December 2024

U.S. Customs and  
Border Protection

# 309 Customs Manifest

Functional Group ID=AQ

## Introduction:

This X12 Transaction Set contains the format and establishes the data contents of the Customs Manifest Transaction Set (309) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used by carriers, terminal operators, port authorities, or service centers to provide Customs with manifest data on cargo arriving in or departing from oceangoing vessels, railroad trains, or other types of conveyances. The transaction set can be also used by carriers to provide terminal operators, port authorities, or service centers with manifest data on cargo arriving at their facilities via the conveyances mentioned above.

This Implementation Guideline used the ASC X12 5020 Standards Version/Release as its base. However, the ACE Truck manifest system is still coded to version 4060. The transaction structure has been altered to accommodate Customs implementation requirements.

## Notes:

If a shipper sends in one bill of lading with multiple pieces of equipment, the manifesting carrier will not send one manifest (309) per piece of equipment to CBP. Multiple pieces of equipment may be accommodated within the same 309 manifest. The Manifest Accept/Reject notification (Set 355) will go out to the Trade in response to this message. Status notifications (350) will go to the carrier as entries are filed and releases obtained.

### SPECIAL MESSAGING CONSTRAINTS:

- Limit one Interchange (ISA-IEA) per message transmission.
- Limit one message Group (GS-GE) per message transmission.
- Limit one transaction sets (ST-SE) of the same Transaction Set (TS) Identifier Code (i.e., 309). Only one is allowed per message transmission.
- Element delimiters used in this transaction must be '\*' (asterisk). No blanks between delimiters if element is null.
- Segment delimiters used in this transaction must be one byte with a value of hex '15'.
- A segment delimiter must be the last byte of data in the message transmission data stream.
- Only transmit uppercase AMERICAN ENGLISH alphabetic data.
- Transmit ONLY displayable characters found on a standard American English keyboard. Low-values, carriage return characters, or other non-standard characters must NOT be transmitted.
- 'Not Used' in the left column indicates that a composite or data element will not be used by CBP.
- 'Dep' in the left column indicates that CBP usage of a particular segment or element is - dependent (Conditional) within the CBP application.
- Per the ASC X12 Standard, an 'M' indicates a Mandatory use, 'O' indicates Optional use, and an 'X' indicates a Conditional use. CBP requirements may override ASC X12 Standard Mandatory or Conditional usages.
- Maximum allowable message transmission size is 12 8 megabytes (12,582,912 8,388,608 bytes) of data.

## Table of Changes

Date of Change	Section(s) Affected	Brief Description of Change
December 2024	M1206 Inbond Control Number	This data element was erroneously removed from the last revision. It has been added back in.
September 2024	P402 Estimated Date of Arrival	Added note that Estimated Date of Arrival cannot be greater than 270 days in the future.
September 2020	Page 1, Notes	Maximum allowable message transmission size should be <b>8</b> Megabytes, not 12. Messages larger than 8MB will end up in CBP's dead letter queue.
	All	Added Table of Changes. Various formatting changes and ongoing updates to correct this document's discrepancies against actual ACE system functionality. Reverting this document to a version 4060 to match ACE system software; previously posted version was 5020.
	N1 Notes	Added consignee specification requirement Note 3 for Section 321 shipments.
	M1018 Manifest Type Code	Value accepted by current system.
	M1109 Bill of Lading Type	Values updated to reflect ACE system's programmed values.
	M1306 Amendment Code	Value 07 is duplicate of 30. Removed 07.
	N101 Shipment Party Type	Values updated to reflect ACE system's programmed values.
	N901 Reference Number Qualifier	Values updated to reflect ACE system's programmed values.
	N10 Notes	Added Note 6 clarification: N10 required for Sec 321 bill.
	N1003 Marks and Numbers	Struck out incorrect sentence in description regarding use of a '.' for continuation.
	NM108	ACE accepts a Proximity Card Number up to 35
	PER03 Comm Num Qualifier	Values updated to reflect ACE system's programmed values.
	VID01 Equipment Type	Added back seal and license plate requirements per code.
	VID09, VID10	VID09 should be Not Used; VID10 – E and L values are Not Used/programmed.
June 2018	M12 Notes	
August 2015		Truck Import/Truck In-transit

**Segment:** **ISA** Interchange Control Header  
**Position:** 0050  
**Loop:**  
**Level:**  
**Usage:** Optional  
**Max Use:** 1  
**Purpose:** To start and identify an interchange of zero or more functional groups and interchange-related control segments

**Syntax Notes:**  
**Semantic Notes:**

**Notes:** Unless otherwise stated the trade participant in the ACE truck manifest program will Send one single transmission containing one transaction group, (GS/GE) containing one Transaction set (ST/SE). In the event the participant chooses to batch multiple Transmissions in a single interchange, notice must be provided to CBP ACE support.

**Data Element Summary**

USAGE	POS. #	SEG. ID	NAME	ATTRIBUTES
M	ISA01	I01	<b>Authorization Information Qualifier:</b> Code identifying the type of information in the Authorization Information.  <i>Always '00'</i>  <b>Code 00:</b> No Authorization Information Present (No meaningful information in I02)	M ID 2/2
M	ISA02	ISA02	<b>Authorization Information:</b> Information used for additional identification or authorization of the interchange sender or the data in the interchange; the type of information is set by the Authorization Information Qualifier (I01)  <i>Always 10 spaces</i>	M AN 10/10
M	ISA03	I03	<b>Security Information Qualifier:</b> Code identifying the type of information in the Security Information.  <i>Always '00'</i>  <b>Code 00:</b> No Security Information Present (No Meaningful Information in I04)	M ID 2/2
M	ISA04	I04	<b>Security Information:</b> This is used for identifying the security information about the interchange sender or the data in the interchange; the type of information is set by the Security Information Qualifier (I03)  <i>Always 10 spaces.</i>	M AN 10/10
M	ISA05	I05	<b>Interchange ID Qualifier:</b> Code indicating the system/method of code structure used to designate the sender or receiver ID element being qualified.  <b>Code 02:</b> SCAC (Standard Carrier Alpha Code) <b>Code ZZ:</b> Mutually Defined  <i>An ID of a sender or receiver that is not a SCAC</i>	M ID 2/2
M	ISA06	I06	<b>Interchange Sender ID:</b> Identification code published by the sender for other parties to use as the receiver ID to route data to them; the sender always codes this value in the sender ID element.  This must reflect a total displacement of 15 bytes. If the interchange sender ID does not fill 15 bytes, the remaining amount must be filled with trailing spaces. May also reflect the ID of the certified service provider. May be identical to that of GS02.	M AN 15/15

M	ISA07	I05	<p><b>Interchange ID Qualifier:</b> Code indicating the system/method of code structure used to designate the sender or receiver ID element being qualified <b>Code ZZ:</b> Mutually Defined</p> <p><i>Always 'ZZ'</i></p>	M	ID	2/2
M	ISA08	I07	<p><b>Interchange Receiver ID:</b> Identification code published by the receiver of the data; When sending, it is used by the sender as their sending ID, thus other parties sending to them will use this as a receiving ID to route data to them.</p> <p>This field must reflect a total displacement of 15 bytes. If the interchange receiver ID doesn't fill 15 bytes the remaining amount must be filled with trailing spaces. This may be the service provider who originally initiated the manifest. Truck Export manifest accepts the following:</p> <p><b>Code CBP-ACE:</b> Production Data Transmissions <b>Code CBP-ACE-Test:</b> Test transmissions</p>	M	AN	15/15
M	ISA09	I08	<p><b>Interchange Date:</b> Date of the interchange</p> <p><i>Date as YYYYMMDD where:</i></p> <p><b>Code YY:</b> Year <b>Code MM:</b> Month <b>Code DD:</b> Day</p>	M	DT	6/6
M	ISA10	I09	<p><b>Interchange Time:</b> Time of the interchange</p> <p><i>Use Eastern Standard/Daylight Time in HHMM format where:</i></p> <p><b>Code HH:</b> Hours <b>Code MM:</b> Minuets</p>	M	TM	4/4
M	ISA11	I65	<p><b>Repetition Separator:</b> Type is not applicable; the repetition separator is a delimiter and not a data element; this field provides the delimiter used to separate repeated occurrences of a simple data element or a composite data structure; this value must be different than the data element separator, component element separator, and the segment terminator</p> <p><i>Preferred: '~'</i></p>	M	AN	1/1
M	ISA12	I11	<p><b>Interchange Control Version Number Code:</b> Code specifying the version number of the interchange control segments</p> <p><b>Code 0406:</b> Standards Approved for Publication by ASC X12 Procedures Review Board through October 2014</p>	M	ID	5/5
M	ISA13	I12	<p><b>Interchange Control Number:</b> A control number assigned by the interchange sender</p>	M	N0	9/9
M	ISA14	I13	<p><b>Acknowledgment Requested Code:</b> Code indicating sender's request for an interchange acknowledgment</p> <p><b>Code 0:</b> No Interchange acknowledgement requested <b>Code 1:</b> Interchange Acknowledgement requested</p> <p><i>Preferred: '0'</i></p>	M	ID	1/1
M	ISA15	I14	<p><b>Interchange Usage Indicator Code:</b> Code indicating whether data enclosed by this interchange envelope is test, production or information</p> <p><b>Code P:</b> Production Data <b>Code T:</b> Test Data</p>	M	ID	1/1

<b>M</b>	<b>ISA16</b>	<b>115</b>	<p><b>Component Element Separator:</b>  Type is not applicable. The component element separator is a delimiter And not a data element; this field provides the delimiter used to separate Component data elements within a composite data structure; this value must Be different from the data element separator and the segment terminator.</p> <p><i>Always ':' (colon)</i></p>	<b>M</b> <b>1/1</b>
----------	--------------	------------	--	---------------------

**Segment:** **GS** Functional Group Header

**Position:** 0075

**Loop:**

**Level:**

**Usage:** Optional

**Max Use:** 1

**Purpose:** To indicate the beginning of a functional group and to provide control information

**Syntax Notes:**

**Semantic Notes:**

- 1 GS04 is the group date.
- 2 GS05 is the group time.
- 3 The data interchange control number GS06 in this header must be identical to the same data element in the associated functional group trailer, GE02.

### Data Element Summary

Usage	Pos. #	Seg. ID	Name	ATTRIBUTES
M	GS01	479	<b>Functional Identifier Code:</b> Code identifying a group of application related transaction sets  <i>Always 'AQ'</i> <b>Code AQ:</b> Ocean Shipment Information	M ID 2/2
M	GS02	142	<b>Application Sender's Code:</b> Code identifying party sending transmission; codes agreed to by trading partners.  Sender Identifier. Up to 4 alphanumeric characters. This may be the identification code of the preparer, agent, or broker preparing the manifest on behalf of the carrier. Value must contain the Standard Carrier Alpha Code (SCAC) or the identity of the Service Center if applicable. If broker is using his 3 character filer code as identification code it must be preceded by a '5'. May be identical to that of ISA06.	M AN 2/15
M	GS03	124	<b>Application Receiver's Code:</b> Code identifying party receiving transmission; codes agreed to by trading partners.  <b>Code CBP-ACE:</b> Production <b>Code CBP-ACE-TEST:</b> Testing	M AN 2/15
M	GS04	373	<b>Date</b> Date expressed as CCYYMMDD where CC represents the first two digits of the calendar year Date as CCYYMMDD where: Code CC: Century Code YY: Year Code MM: Month of Year Code DD: Day	M DT 8/8
M	GS05	337	<b>Time:</b> Time expressed in 24-hour clock time as follows: HHMM, or HHMMSS, or HHMMSSD, or HHMMSSDD, where H = hours (00-23), M = minutes (00- 59), S = integer seconds (00-59) and DD = decimal seconds; decimal seconds are expressed as follows: D = tenths (0-9) and DD = hundredths (00-99)  <i>Use Eastern Standard/Daylight Time. Time as HHMM where:</i> <b>Code HH:</b> Hours <b>Code MM:</b> Minuets	M TM 4/8
M	GS06	28	<b>Group Control Number:</b> Assigned number originated and maintained by the sender.	M N0 1/9
M	GS07	455	<b>Response Agency Code:</b> Code identifying the issuer of the standard; this code is used in conjunction with Data Element 480	M ID 1/2

			Always 'X'	
			Code X: Accredited Standards Committee X12	
<b>M</b>	<b>GS08</b>	<b>480</b>	<p><b>Version / Release / Industry Identifier Code:</b>  Code indicating the version, release, subrelease, and industry identifier of the EDI standard being used, including the GS and GE segments; if code in DE455 in GS segment is X, then in DE 480 positions 1-3 are the version number; positions 4-6 are the release and sub-release, level of the version; and positions 7-12 are the industry or trade association identifiers (optionally assigned by user); if code in DE455 in GS segment is T, then other formats are allowed.</p> <p>Code 004060: Standards Approved for Publication by ASC X12 Procedures Review Board through October 2013</p>	<b>M      AN      1/12</b>

**Segment:** **ST** Transaction Set Header

**Position:** 0100

**Loop:**

**Level:**

**Usage:** Mandatory

**Max Use:** 1

**Purpose:** To indicate the start of a transaction set and to assign a control number

**Syntax Notes:**

- Semantic Notes:**
- 1 The transaction set identifier (ST01) is used by the translation routines of the interchange partners to select the appropriate transaction set definition (e.g., 810 selects the Invoice Transaction Set).
  - 2 The implementation convention reference (ST03) is used by the translation routines of the interchange partners to select the appropriate implementation convention to match the transaction set definition. When used, this implementation convention reference takes precedence over the implementation reference specified in the GS08.

#### Data Element Summary

USAGE	POS. #	SEG. ID	NAME	ATTRIBUTES
M	ST01	143	<b>Transaction Set Identifier Code:</b> Code identifying a Transaction Set  <i>Always '309'</i>  <b>Code 309:</b> Customs Manifest	M ID 3/3
M	ST02	329	<b>Transaction Set Control Number:</b>  Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set	M AN 4/9
Not Used	ST03	1705	<b>Implementation Convention Reference</b>	O AN 1/35

**Segment: M10 Manifest Identifying Information****Position:** 0200**Loop:****Level:****Usage:** Mandatory**Max Use:** 1**Purpose:** To transmit manifest identifying information**Syntax Notes:** 1 If either M1004 or M1010 is present, then the other is required.

2 If either M1015 or M1016 is present, then the other is required.

3 At least one of M1005 or M1006 is required.

**Semantic Notes:** 1 M1004 is the International Maritime Organization (IMO) Vessel Code maintained in Lloyd's Register of Shipping.

2 M1007 is used for the six-digit Numeric Manifest Sequence Number.

3 M1011 indicates if the transmission involves an in-bond participant. A 'Y' indicates it does; an 'N' indicates it does not.

4 M1012 is a unique identification number for the manifest assigned by the originator of the manifest with a maximum length of 15.

5 M1017 is the type of initial manifest being amended by this transmission.

**Comments:** 1 M1003 is the code identifying the country in which the conveyance is registered.**Notes:** Once the original manifest (M1009 code 'W') has been submitted and accepted, the M10 segment becomes 'frozen'. In any subsequent amendments or actions (Sets 309 code 'Y', 353) the mandatory and required elements in the M10 segment in the original manifest must be submitted. This means if a conveyance name or identification number (M1005) were submitted in the original manifest it is required in subsequent amendments or actions. Key information is comprised of M1001, M1006, and M1009.**Data Summary**

USAGE	POS. #	SEG. ID	NAME	ATTRIBUTES
Required	M1001	140	<b>Standard Carrier Alpha Code:</b> Code identifying the Standard Carrier Alpha Code Standard Carrier Alpha Code <i>SCAC of the Carrier Initiating this manifest</i>	O ID 2/4
Required	M1002	91	<b>Transportation Method/Type Code:</b> Code specifying the method or type of transportation for the shipment. <i>Always 'J'</i> <b>Code J:</b> Truck	O ID 1/2
	M1003	26	<b>Country Code</b> Code identifying the country <i>ISO 2 Alpha country code; country of truck origin for border crossing.</i>	O ID 2/3
Not Used	M1004	597	<b>Vessel Code</b>	X ID 1/8
Required	M1005	182	<b>Vessel Name:</b> Name of ship as documented in "Lloyd's Register of Ships" Trip Number. If a trip number is not known specify SYSTEM. Truck manifest accepts only 21 positions and only alphanumerics with no embedded spaces or special characters.	X AN 2/28
Required	M1006	55	<b>Flight/Voyage Number:</b> Identifying designator for the particular flight or voyage on which the cargo travels  May contain a reference number such as the Julian date (YYDDD) to promote uniqueness. May contain 'TRUCK' in the preliminary manifest. If nothing is indicated, the system will default to 'TRUCK'.	O AN 2/30

**Segment:** **VEH** Vehicle Information

**Position:** 0250

**Loop:**

**Level:** N/A

**Usage:** Optional

**Max Use:** 10

**Purpose:** To provide descriptions that identify a specific vehicle

**Syntax:** 4 **L040507** - If VEH04 is present then at least one of VEH05 or VEH07 is required

5 **C0504** - If VEH05 is present then VEH04 is required

6 **C060405** - If VEH06 is present then VEH04 and VEH05 are required

7 **C0704** - If VEH07 is present then VEH04 is required

10 **E1026** - Only one of VEH10 or VEH26 may be present

10 **C1017** - If VEH10 is present then VEH17 is required

18 **P1819** - If either VEH18 or VEH19 is present then the other is required

20 **L200221** - If VEH20 is present then at least one of VEH02 or VEH21 is required

21 **P2122** - If either VEH21 or VEH22 is present then the other is required

26 **C2617** - If VEH26 is present then VEH17 is required

**Semantic:** 4 VEH04 applies to VEH05, VEH06, VEH07

5 VEH05 is vehicle make

6 VEH06 is vehicle model

7 VEH07 is vehicle style

8 VEH08 is length of vehicle measured in feet

9 VEH09 is the vehicle reference number

10 VEH10 is the vehicle registration state or province

11 VEH11 is used to identify a territory as defined by trading partners

12 VEH12 is the used car indicator.

A 'Y' indicates the vehicle is a used vehicle

A 'N' indicates the vehicle is a new vehicle.

A value of 'U' indicating 'unknown' cannot be used.

13 VEH13 is the original cost of the vehicle when it was new. 'OCN'—Original cost new

14 VEH14 is the Vehicle altered indicator.

A 'Y' indicates the vehicle was altered.

A 'N' indicates the vehicle was not altered.

A value of 'U' indicating 'unknown' cannot be used.

15 VEH15 is the value of the alterations for the vehicle

17 VEH17 is the country of the State in VEH10 or the country subdivision in VEH26

18 VEH18 is the name of the Vehicle owner

19 VEH19 is the Residence country of the vehicle owner

21 VEH21 is the Automated Commercial Environment (ACE) ID assigned by U.S. CBP

24 VEH24 is the transponder number of the vehicle

25 VEH25 is the Department of Transportation (DOT) number of the vehicle

**Notes:**

1 If the conveyance is preregistered in ACE either ACE ID, conveyance ID, VIN Number or transponder ID is required.

2 Only 1 occurrence of conveyance per trip. However, the VEH segment can be repeated to provide up to 4 license plates/multiple IIT's of the conveyance. If the VEH segment is repeated, supply only elements VEH09, VEH10, and VEH20.

**Segment:** **M11** Manifest Bill of Lading Details

**Position:** 0800  
**Loop:** P4/LX Mandatory  
**Level:**  
**Usage:** Optional (Dependent)  
**Max Use:** 1  
**Purpose:** To transmit bill of lading detail information for a manifest

- Syntax Notes:**
- 3 P0304** If either M1103 or M1104 is present, then the other is required.
  - 5 P0506** If either M1105 or M1106 is present, then the other is required.
  - 7 P0708** If either M1107 or M1108 is present, then the other is required.
  - 11 P1113** If either M1111 or M1113 is present, then the other is required.
  - 15 C1514** If M1115 is present, then M1114 is required.
  - 18 C1815** If M1118 is present, then M1115 is required.
  - 19 C1918** If M1119 is present, then M1118 is required.

- Semantic Notes:**
- 1** M1101 is the unique bill of lading number.
  - 2** M1102 is used for foreign port where the cargo is destined.
  - 3** M1103 is used for total number of pieces on a bill of lading using the smallest package unit (maximum eight-digits).
  - 4** M1104 is the smallest package unit code.
  - 11** M1111 is the house bill number for consolidation.
  - 12** M1112 is the unique bill of lading issuer code.
  - 13** M1113 is the issuer code of the consolidated shipment.
  - 14** M1114 is the code of the secondary party nominated to receive bill of lading status notifications.
  - 15** M1115 is the code of the second secondary party nominated to receive bill of lading status notifications.
  - 18** M1118 is the Standard Carrier Alpha Code (SCAC) of an additional second notify carrier.
  - 19** M1119 is the Standard Carrier Alpha Code (SCAC) of an additional second notify carrier.
  - 20** M1120 is the last place/port prior to loading.
  - 21** M1121 is the first foreign port where the carrier takes possession of the cargo.
  - 22** M1122 identifies mode of transportation from the last place/port prior to loading.
  - 23** M1123 is the method of payment for transportation.
  - 24** M1124 is the Maritime Administration Cargo Preference Program Code (see code source 926).
  - 25** M1125 identifies the reporting identifier used for Port of Lading in M1102.
  - 27** M1127 is the date the Goods returning to the U.S., Canada or Mexico departed the U.S., Canada, or Mexico.
  - 28** M1128 is the indicator as to whether the Goods returning to the U.S., Canada or Mexico never left the control of the foreign country's Customs or the border crossing carrier while out of the country. A 'Y' indicates the Goods never left the control of Customs or the border crossing carrier while out of the country. An 'N' indicates the Goods did leave the control of foreign country's Customs or the border crossing carrier while out of the country.

- Notes:**
- 1. The unique Bill of Lading number is comprised of the SCAC from M1112 and the issuer sequence number in the M1101. Customs Brokers must obtain this number to file an entry.
  - 2. Truck manifest accepts a maximum use of only 999 iterations of the P4/LX loop

**Segment:** **N1 Party Identification**

**Position:** 1000

**Loop:** P4/LX/N1 Mandatory

**Level:**

**Usage:** Mandatory

**Max Use:** 1

**Purpose:** To identify a party by type of organization, name, and code

**Syntax Notes:** 2 **R0203** - At least one of N102 or N103 is required.

3 **P0304** - If either N103 or N104 is present, then the other is required.

**Semantic Notes:**

**A** This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.

**B** N105 and N106 further define the type of entity in N101.

**Notes:**

1. There must be at least TWO occurrences of the N1 loop. One must contain an N101 of 'SH' with the name of the shipper in N102. The second occurrence must contain an N101 of 'CN', to designate Consignee with the party's name in N102.
2. Either a legitimate party ID is provided in N104 or full party data must be supplied.
3. For Section 321 (de minimis informal entry – entry type 86) shipments, the consignee party must be provided as the name of the owner or purchaser "in care of" the address of the domestic warehouse or fulfillment center to which the shipment is destined.

**Segment:** **M12** In-bond Identifying Information

**Position:** 1300  
**Loop:** P4/LX/M12  
**Level:**  
**Usage:** Optional  
**Max Use:** 1

**Purpose:** To transmit in-bond information for a manifest

- Syntax Notes:**
- 2 **E0206** - Only one of M1202 or M1206 may be present
  - 2 **C0608** - If M1206 is present, then M1208 is required.
  - 3 **P0809** - If either M1208 or M1209 is present, then the other is required.
  - 4 **P1011** - If either M1210 or M1211 is present, then the other is required.

- Semantic Notes:**
- 3 M1203 is a 4-digit numeric Census Schedule D code when identifying a U.S. port. It is the port destination if M1201 is '61'. It is the port of export if M1201 is '62' or '63'.
  - 4 M1204 is a 5-digit numeric Census Schedule K code. It is the foreign port of destination if M1201 is '62' or '63'.
  - 7 M1207 identifies the carrier to whom liability is transferred.
  - 12 M1212 is the U.S. Food and Drug Administration prior notification requirement indicator. A 'Y' indicates that the shipper has advised the commodity is subject to the prior notification requirement. An 'N' indicates the commodity is not subject to the prior notification requirement. If blank, the default value is 'N'.
  - 13 M1213 is the estimated date of departure of the in-bond from the U.S.
  - 14 M1214 is the FIRMS (Facilities Information Resources Management System) code of the location of the in-bond shipment.
- Comments:**
- 2 If M1202 does not contain the paperless entry number then M1206 is required when used for U.S. in-bond information.
  - 5 M1205 is the value in whole U.S. dollars of the in-bond shipment. Use \$20 per kilo if value is unknown.

**Notes:**

			Facilities Information Resources Management System (FIRMS) code at the destination in-bond port facility (CFS). If destination inbond port facility code the in-bond data (M1201, M1202, M1203, M1204, M1206, M1209) are required if applicable. CBP truck manifest accepts only 4 positions.	
--	--	--	---	--

**Segment:** **VID** Conveyance Identification

**Position:** 1500  
**Loop:** P4/LX/VID  
**Level:** N/A  
**Usage:** Optional (Dependent)  
**Max Use:** 1

**Purpose:** To identify a conveyance and its attributes

**Syntax Notes:** **14 L141518** - If VID14 or VID18 (VID15) is present, then the other is required.

**15 E1518** - Only one of VID15 or VID18 may be present.

**15 C1516** - If VID15 is present, then VID16 is required.

**16 L161518** - If VID16 is present, then at least one of VID15 or VID18 is required.

**18 C1816** - If VID18 is present, then VID16 is required.

**Semantic Notes:** **12** VID12 is the Census Schedule K code for the foreign port of loading on a vessel.

**13** VID13 is the Standard Carrier Alpha Code (SCAC) of the Haulage Rights Carrier.

**14** VID14 is the license plate of the equipment.

**15** VID15 is the state or province of the license in the VID14.

**16** VID16 is the country of the license in the VID15 or VID18.

**17** VID17 is the ACE (Automated Commercial Environment) ID of the equipment identified in the VID03.

**18** VID18 is the country subdivision of the license in the VID14.

**Notes:** 1. The combination of the VID02 and VID03 elements comprise the **equipment** number.

2. There must be at least one N10 segment if the VID segment is used.

3. A specific **equipment** or 'NC' for No **Equipment** may be reported only once within the same bill of lading.

4. When reporting Equipment Type in VID09, use the relevant ISO code for the equipment characteristics. Refer to CAMIR Appendix M for valid codes.

5. Either the ACE ID or Equipment Number or License Plate, State/Province, Country, or full equipment data is required.

6. Truck Manifest will accept 4 occurrences of license plates in the P4/LX/VID loop.

7. If the VID is repeated in loops only the VID03, VID14 and VID18 if applicable should be supplied.

8. **The VID segment is required only when reporting shipment data on non-empty trips**

**Segment:** **N10** Quantity and Description  
**Position:** 1600  
**Loop:** P4/LX/VID/N10 Optional (Dependent)  
**Level:**  
**Usage:** Optional (Dependent)  
**Max Use:** 1  
**Purpose:** To indicate line item quantity, description, marks and numbers, commodity code, weight, and Customs value

**Syntax Notes:**  
**4 P0405** If either N1004 or N1005 is present, then the other is required.  
**6 P0613** If N1006 or N1013 is present, then the other is required.  
**7 P0708** If either N1007 or N1008 is present, then the other is required.

**Semantic Notes:**  
**9** N1009 is the U.S. Customs and Border Protection (CBP) bar code number for Line Release.  
**11** N1011 is the country of manufacture of the goods.  
**12** N1012 is the country of the final destination of the goods.  
**13** N1013 is the currency of the value of the value of the goods in N1006.  
If N1013 is not used, the default currency of N1006 is USD (US Dollar).

**Notes:**

- 1** N10 may be repeated for free-form description, marks and numbers, and C4 code.
- 2** If a commodity requires extra lines of description, send N1002 only. N1001 may be 0 (zero) or empty.
- 3** Do not exceed 999 repetitions of the N10 loop.
- 4** Each new commodity requires a Weight Unit Code (N1007), Weight (N1008) and a Manifest Unit Code (N1011).
- 5** There must be at least one N10 segment if a VID segment is used. If container is Empty send '1' in element N1001, 'EMPTY' in element N1002 and 'NO MARKS' in element N1003.
- 6** There must be at least one N10 segment if the M1109 Bill Type Code is '13' or '35' for Section 321 release, where the N1006 Shipment Value and N1011 Country of Origin are required.

**Data Element Summary**

USAGE	Pos. #	Seg. ID	Name	ATTRIBUTES
Dep	N1001	380	<p><b>Quantity:</b>  Numeric value of quantity  Required for each new commodity. CBP accepts up to 10 numeric characters in this element.</p> <p>Full bill quantity or breakdown quantity may be reported as long as all N1001 elements equal the quantity listed in M1103.</p> <p>A minimum of 1 N10 segment is required per container/equipment for a shipment.</p> <p>If there is more than one line of description for a commodity in a shipment, the first N1001 for each commodity will have the quantity for that commodity.</p> <p>If there is more than one VID segment per shipment, each VID will have a minimum of one N10 segment containing the quantity of the commodity in the container. ACE will compute the total quantity for the bill by adding all the quantities in all the VID segments.</p> <p>If a carrier transmits a shipment control number (master bill number) to which bill control numbers (house bills) will be associated, carrier indicates by code 'CN' in M1109 and transmits a '0' in this element. ACE will total the quantities for this bill by adding the quantities of all associated house bills.</p> <p>When N10 is used to report continued Description and/or Marks and Numbers, the N1001 may be '0' or blank.</p>	O 1R 1/15

<b>Required</b>	<b>N1002</b>	<b>369</b>	<p><b>Free-form Description:</b> Used for commodity description.</p> <p><i>At least 1 line of description is Required.</i></p> <p>If the N10 is used to provide additional Marks and Numbers in the N1003 and additional Description does not exist or is not available, value should be '.' in this element.</p>	<b>O AN 1/4</b>
<b>Required</b>	<b>N1003</b>	<b>87</b>	<p><b>Marks and Numbers:</b> Marks and numbers used to identify a shipment or parts of a shipment</p> <p>The written description of the symbols and markings on the outside of the packages.</p> <p>If Marks and Numbers do not exist or are not available, value should be 'NO MARKS' in this element.</p> <p><i>CBP accepts up to 45 alpha/numeric characters in this element.</i></p>	<b>O AN 1/48</b>
	<b>N1004</b>	<b>23</b>	<p><b>Commodity Code Qualifier:</b> Code identifying the commodity coding system used for Commodity Code.</p> <p>Required for inbond moves –if M1201 is '62', '63' or '70'.</p> <p><b>Code J:</b> Harmonized Code System (United States)</p>	<b>X ID 1/1</b>
