Government Issue Paper
Intelligent Enforcement Subcommittee
Bond Working Group**

December 2023

**U.S. Customs and
Border Protection**

Pub# 3477-1123

Office of Trade, Trade Policy and Programs
Intelligent Enforcement Subcommittee
Bond Working Group
December 2023

Action Required: Informational

Background:

- U.S. Customs and Border Protection (CBP) is implementing risk-based bonding by leveraging existing authorities to develop a sustainable approach with a focus on near-term deliverables.

Issue:

- The 15th Term Commercial Customs Operations Advisory Committee (COAC) Bond Working Group provided input to CBP for update of Customs Directive 3510-004, *Monetary Guidelines for Setting Bond Amounts*.

Current Status:

Risk-Based Bonding Initiative

- CBP published the internal Customs Directive 3510-006, *Monetary Guidelines for Setting Bond Amounts*.
 - CBP will follow up with a corresponding external guidance document.
- CBP is working to complete the following remaining initiatives:
 - Advancing the Notice of Proposed Rulemaking to incorporate eBond in 19 C.F.R. § 113, updating eBond functionality from a test to a requirement, eliminating the majority of paper bond processing, and ensuring bonds are on file.

Automated Commercial Environment (ACE) eBond Enhancements

- CBP is meeting biweekly with the Trade Support Network (TSN) to draft requests for development (RFDs) to incorporate remaining bond types into ACE eBond.
- The 15th Term COAC Bond Working Group previously recommended the incorporation of four additional types of eBonds. In order of priority, they are: Importer Security Filing (ISF), Department of Transportation (DOT), International Trade Commission (ITC), and the Intellectual Property Rights (IPR) bonds.
 - The TSN completed the ISF RFD and CBP presented it to the Product Management Committee in February 2023. The RFD remains on the prioritized and unfunded backlog.
 - The DOT RFD has been drafted and is on hold pending guidance from DOT leadership.
 - CBP presented the ITC RFD to the Product Management Committee in October 2023, and it was added to the prioritized and unfunded backlog.
 - The IPR RFD is being drafted.

Additional Areas of Focus

- CBP is finalizing guidance involving the appropriate methods for eBond and non-eBond participants to submit bonds to CBP, and Informal entry bond requirements.

- Automated Commercial System decommissioning: CBP is working to ensure the ACE entry summary query will provide liquidation and billing information to the entry summary surety on file. This will include entry summary transactions filed before bond requirements were implemented and that are not connected to an ACE eBond.

Next Steps:

- CBP will:
 - Publish the external guidance document corresponding to CBP Directive 3510-006, *Monetary Guidelines for Setting Bond Amount*.
 - Collaborate with TSN to finalize the DOT RFD (once DOT leadership provides guidance) and the IPR RFD.
 - Publish guidance regarding the appropriate methods of submitting bonds to CBP (for various bond types by eBond and non-eBond participants) and informal entry bond requirements.
