Before You Begin

To use the Indigenous Language Identification resource, open the myCBP app and make sure you have a **stable internet connection** when you open the Indigenous Language Identification resource for the first time.
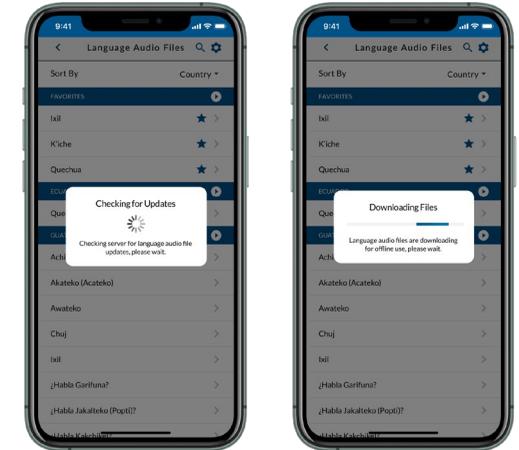

3. Select a Language Audio File

The language audio files are in various categories based on the Sort By option that is selected. Select **an audio file.**

1. Open Indigenous Language Identification

Select **Resources**, then select **Indigenous Language Identification.**

4. Play a Language Audio File

To play a file, select **the *play icon***. You can also see information related to the language audio file in the File Information and Subtitles tabs.
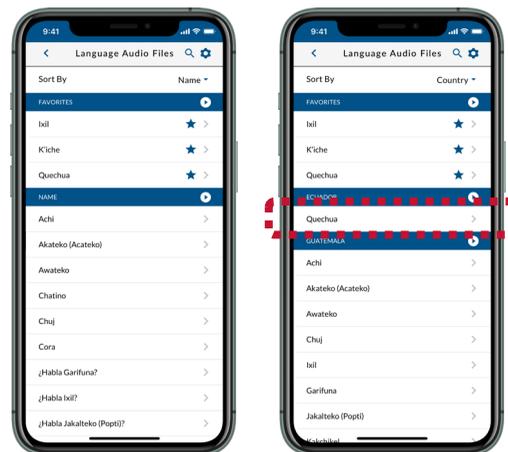

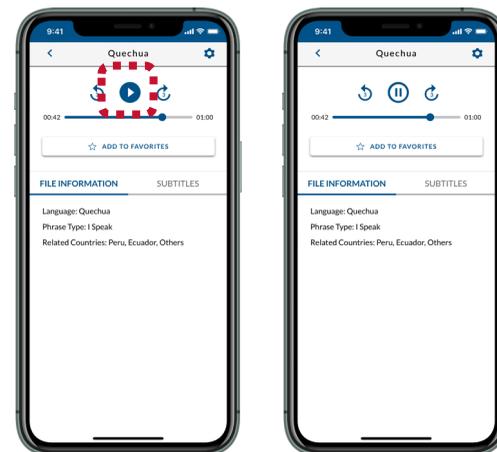

2. Download Language Audio Files

Please wait while myCBP downloads the language audio files to your device.

5. Play Multiple Language Audio Files

To play multiple files, select **the *play icon*** in each sorted category and all audio files in that category will play one by one.
