ace REPORTS

DATA DICTIONARY

EXPORTERS

The **ACE Reports Data Dictionary** is a reference guide designed to enhance the understanding of ACE Reports by clearly categorizing and defining standard reports and data objects available to system users. It is meant to assist users in identifying reports and/or data objects that best fulfill a particular business need and to encourage overall use of the reporting tool. The dictionary is a living document that will evolve as reports capabilities change. Each update will be marked with the month and year of issuance to allow for quick and easy identification of the most recently published document.

This version of the ACE Reports Data Dictionary contains detailed information on reports and data that can be accessed by **Exporters**. Additional versions will be made available to other stakeholder groups including Brokers, Carriers, Importers and Sureties.

The following features have been integrated into the dictionary to enable users to navigate this document and quick access relevant content:

1. **Linked Table of Contents –** *Enables users to quickly locate a particular reporting area in the electronic version of this document by simply clicking on the desired section title listed in the table of contents*

2. **Built-In Search Feature** *– Enables the user to search for a word or phrase (e.g., a specific data object or report title) within the electronic version of this document by pressing Ctrl+F on the keyboard*

Due to the length of the dictionary, it is recommended that users take advantage of these features by working with this reference document in electronic format.

Table of Contents

Trade Export

Trade Export reports are located in ACE Reports at Public Folders > AES > Trade Export.

These reports contain transactional export data from the Automated Export System (AES) that is confidential and should not be disclosed for nonofficial purposes per the Foreign Trade Regulations, Section 30.60.

The following two tables outline standard Trade Export reports as well as data objects available in the Trade Export data universe that can be added to these reports.

Trade Export Standard Reports

Number	Name	Description	Default Data Objects
AES-201	Filer Transactions	Provides export transactions where the Filer ID matches the EIN associated with this account.	ITN, Filing Option Type, EEI Filing Date, Export Date, USPPI ID Number, USPPI Contact Name, Filer Name, Ultimate Consignee Contact Name, Ultimate Consignee Type Code, USPPI Name, Forwarding Agent Name, Conveyance Name, Port of Export Code, Commodity Line Number, HTS/Schedule B Number, HTS/Schedule B Description, Quantity 1, Unit of Measure Code (Quantity 1), Quantity 2, Unit of Measure Code (Quantity 2), Commodity Line Value, Export License Number, License Value
AES-202	USPPI Transactions	Provides export transactions where the USPPI ID matches the EIN associated with this account (self-filed and agent-filed). Routed export transactions filed by an authorized agent will only populate in the report if no date parameters are used and will include the 16 data elements provided by the USPPI to the authorized agent. All other data elements will be blank. These types of transactions will have a Routed Transaction Indicator equal to "Y" and the Filer Type Code equal to "F" (Forwarder Filed).	ITN, Filer Type Code, Routed Transaction Indicator, Filing Option Type, EEI Filing Date, Export Date, USPPI ID Number, USPPI Contact Name, Filer Name, Ultimate Consignee Contact Name, Ultimate Consignee Type Code, USPPI Name, Forwarding Agent Name, Conveyance Name, Port of Export Code, Commodity Line Number, HTS/Schedule B Number, HTS/Schedule B Description, Quantity 1, Unit of Measure Code (Quantity 1), Quantity 2, Unit of Measure Code (Quantity 2), Commodity Line Value, Export License Number, License Value
AES-203	USPPI Agent-Filed Routed Transactions	Provides routed export transactions where an authorized agent completed the filing. This report will produce a historical list of all such transactions that exist in the database for the USPPI ID/EIN associated with this account (dating back 5+ years) and will only display the 16 data elements that the USPPI provided to the authorized agent.	U.S. State of Origin, Foreign Trade Zone ID, USPPI Name, USPPI Address Line 1, USPPI Address Line 2, USPPI City, USPPI State, USPPI Zip Code, USPPI ID Number, Origin of Goods D/F Indicator, Commodity Description, HTS/Schedule B Number, Quantity 1, Commodity Line Value, Quantity 2, Export Control Classification Number

Trade Export Data Objects

Object Name	Object Description
14 Days Ago	The date object that can be added to a report query filter, which will enable a saved report to always return data for the previous 14 days. This eliminates the need to filter by specific dates each time a saved report is run. Date objects allow reports to display continually updated data that matches variable dates or date ranges.
180 Days Ago	The date object that can be added to a report query filter, which will enable a saved report to always return data for the previous 180 days. This eliminates the need to filter by specific dates each time a saved report is run. Date objects allow reports to display continually updated data that matches variable dates or date ranges.
30 Days Ago	The date object that can be added to a report query filter, which will enable a saved report to always return data for the previous 30 days. This eliminates the need to filter by specific dates each time a saved report is run. Date objects allow reports to display continually updated data that matches variable dates or date ranges.
365 Days Ago	The date object that can be added to a report query filter, which will enable a saved report to always return data for the previous 365 days. This eliminates the need to filter by specific dates each time a saved report is run. Date objects allow reports to display continually updated data that matches variable dates or date ranges.
45 Days Ago	The date object that can be added to a report query filter, which will enable a saved report to always return data for the previous 45 days. This eliminates the need to filter by specific dates each time a saved report is run. Date objects allow reports to display continually updated data that matches variable dates or date ranges.
7 Days Ago	 The date object that can be added to a report query filter, which will enable a saved report to always return data for the previous 7 days. This eliminates the need to filter by specific dates each time a saved report is run. Date objects allow reports to display continually updated data that matches variable dates or date ranges.
Carrier SCAC/IATA Code	The carrier ID, which is either the Standard Carrier Alpha Code (SCAC) or the International Air Transport Association (IATA) code. For vessel, rail, or truck shipments, the SCAC is used; for air shipments the IATA code is used. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Commodity Description	A brief commercial description of the commodity reported on a particular commodity line item of an Electronic Export Information (EEI) filing.
Commodity Line Gross Weight (KG)	The line item weight, in KG, for a particular commodity line item of an Electronic Export Information (EEI) filing. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Commodity Line Number	The sequential line item number corresponding to a commodity on an Electronic Export Information (EEI) filing. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Commodity Line Value	The value of an individual line item on a particular shipment.
Conveyance Name	The name of the conveyance used to export the merchandise on a particular Electronic Export Information (EEI) filing. For ocean shipments, this will return the vessel name. For air, truck, and rail shipments, this will return the carrier name. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.

Trade Export Data Objects

Object Name	Object Description
Current Month End	The date object that can be added to a report query filter, which will enable a saved report to always return data for the current month. This date object is designed to be used in conjunction with "Current Month Start" when setting a date range for a given query. These two data objects will create a date range that will enable the query to always return data from the current month's start through the last day of the current month. This eliminates the need to filter by specific dates each time a saved report is run. Date objects allow reports to display continually updated data that matches variable dates or date ranges.
Current Month Start	The date object that can be added to a report query filter, which will enable a saved report to always return data for the current month. This date object is designed to be used in conjunction with "Current Month End" when setting a date range for a given query. These two data objects will create a date range that will enable the query to always return data from the current month's start through the last day of the current month. This eliminates the need to filter by specific dates each time a saved report is run. Date objects allow reports to display continually updated data that matches variable dates or date ranges.
Current Quarter End	The date object that can be added to a report query filter, which will enable a saved report to always return data for the current quarter. This date object is designed to be used in conjunction with "Current Quarter Start" when setting a date range for a given query. These two data objects will create a date range that will enable the query to always return data from the current quarter's start through the last day of the current quarter. This eliminates the need to filter by specific dates each time a saved report is run. Date objects allow reports to display continually updated data that matches variable dates or date ranges.
Current Quarter Start	The date object that can be added to a report query filter, which will enable a saved report to always return data for the current quarter. This date object is designed to be used in conjunction with "Current Quarter End" when setting a date range for a given query. These two data objects will create a date range that will enable the query to always return data from the current quarter's start through the last day of the current quarter. This eliminates the need to filter by specific dates each time a saved report is run. Date objects allow reports to display continually updated data that matches variable dates or date ranges.
Current Year End	The date object that can be added to a report query filter, which will enable a saved report to always return data for the current year. This date object is designed to be used in conjunction with "Current Year Start" when setting a date range for a given query. These two data objects will create a date range that will enable the query to always return data from the current year's start through the last day of the current year. This eliminates the need to filter by specific dates each time a saved report is run. Date objects allow reports to display continually updated data that matches variable dates or date ranges.
Current Year Start	The date object that can be added to a report query filter, which will enable a saved report to always return data for the current year. This date object is designed to be used in conjunction with "Current Year End" when setting a date range for a given query. These two data objects will create a date range that will enable the query to always return data from the current year's start through the last day of the current year. This eliminates the need to filter by specific dates each time a saved report is run. Date objects allow reports to display continually updated data that matches variable dates or date ranges.

Trade Export Data Objects

Object Name	Object Description
DDTC Eligible Party Certification Indicator	A 1 character code indicating certification by the U.S. exporter that the exporter is an eligible party to participate in defense trade. This certification is required only when an exemption is claimed. This is a self-certification by the exporter that they are an eligible party under the International Traffic in Arms Reduction (ITAR) (22 CFR 120.1(c)). Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
DDTC ITAR Exemption Number	The specific Directorate of Defense Trade Controls (DDTC) International Traffic in Arms Reduction (ITAR) exemption code used, when required in a commodity filing. These specific citations (exemption numbers/codes) identified in the Code of Federal Register (see 22 CFR 120-130) exempt a shipment from the requirement for a license or other written authorization from the DDTC. A complete list of DDTC ITAR Exemption Codes can be found under Appendix O of the AES Trade Interface Requirements (AESTIR). Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
DDTC Quantity	The quantity reported in conjunction with the unit of measure (UOM) on a particular commodity line item of an Electronic Export Information (EEI) filing. This object only returns a value for commodity line items associated with Directorate of Defense Trade Control (DDTC) license type exemption numbers/codes. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
DDTC Registration Number	The unique registration ID number assigned by Directorate of Defense Trade Control (DDTC) to a particular company that allows them to use certain export licenses and license exemptions as described in part 122 of the International Traffic in Arms Reduction (ITAR) (22 CFR, 120-130) Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
DDTC SME Indicator	An indication that the articles reported on a commodity line item of an Electronic Export Information (EEI) filing are designated as Significant Military Equipment (SME), meaning special export controls are warranted because of their capacity for substantial military utility or capability. For a listing of articles categorized as SME refer to 22 CFR 121.1. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
DDTC Unit of Measure	The unit of measure (UOM) that is reported in conjunction with the quantity on a particular line item of an Electronic Export Information (EEI) filing. Possible values include, but are not limited to: "DOZ" indicating Dozen, "KG" indicating 1,000 Grams, and "PCS" indicating Pieces. This object only returns a value for commodity line items associated with Directorate of Defense Trade Control (DDTC) license type exemption numbers/codes. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.

Trade Export Data Objects

Object Name	Object Description
DDTC USML Category Code	A 2 character code indicating the United States Munitions List (USML) category code of the article being exported. USML articles and services designated for defense purposes under the International Traffic in Arms Reduction (ITAR) are specified in 22 CFR 121. Possible values include, but are not limited to: "07" indicating Tanks and Military Vehicles, "08" indicating Aircraft and Associated Equipment, "09" indicating Military Training Equipment, "10" indicating Protective Personnel Equipment, and "11" indicating Military Electronics. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
EEI Filing Date	The month, day, and year (MM/DD/YYYY) in which an Electronic Export Information (EEI) was filed. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Equipment Number	The identification for shipping equipment that contains the cargo on a particular Electronic Export Information (EEI) filing, such as container or igloo (Unit Load Device (ULD)) number, the truck license number, or the rail car number. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Export Control Classification Number	The export control classification number (ECCN) identified on a particular line item of an Electronic Export Information (EEI) filing. The ECCN is used to identify items on the Commerce Control List (CCL), which are a list of items found in Supplement No. 1 to Part 774 of the Export Administration Regulations (EAR).
Export Date	The actual or estimated month, day, and year (MM/DD/YYYY) that the exporting vessel departed the United States for export, as stated on an Electronic Export Information (EEI) filing. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Export Information Code	A 2 character code identifying export information on a particular line item of a shipment. Possible values include, but are not limited to: "AE" indicating AE-SHIPMENT INFORMATION FILED THROUGH AES, "FI" indicating FI-IMPELLED FOREIGN MILITARY SALES, "CI" indicating CI-IMPELLED GOODS DONATED FOR CHARITY, and "DB" indicating DB-DRAWBACK. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Export License Number	License number, permit number or authorization number assigned by the agency issuing the export license when present on a particular commodity line item of an Electronic Export Information (EEI) filing. This field may be the license number, CFR citation, authorization symbol, or Kimberley Process Certificate Number assigned by the licensing agency. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.

Trade Export Data Objects

Object Name	Object Description
Filer ID Number	The identification number (excluding any special characters such as hyphens "-") of the filer listed on a particular Electronic Export Information (EEI) filing. The filer is the U.S. Principal Party in Interest (USPPI) or authorized agent who has been approved to file an EEI directly in the AES system or the AESDirect Internet application. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Filer ID Type	The description indicating the identification type of the filer. Possible values include: "DUNS," "SSN," "EIN," and "Foreign Entity." Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Filer ID Type Code	A 1 character code indicating the identification type of the filer. Possible values include: "D" indicating DUNS, "S" indicating SSN, "E" indicating EIN, and "T" indicating Foreign Entity. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Filer Name	The company or enterprise name of the filer listed on a particular Electronic Export Information (EEI) filing. The filer is the U.S. Principal Party in Interest (USPPI) or authorized agent who has been approved to file an EEI directly in the AES system or the AESDirect Internet application. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Filer Type	The description indicating whether the a particular Electronic Export Information (EEI) filing was established (or last maintained) as being filed on behalf of an exporter by a forwarding agent, or if it was filed directly by the exporter itself. Possible values are: "Exporter Filed Shipment" and "Forwarder Filed Shipment."
Filer Type Code	A 1 character code indicating whether the a particular Electronic Export Information (EEI) filing was established (or last maintained) as being filed on behalf of an exporter by a forwarding agent, or if it was filed directly by the exporter itself. Possible values are: "E" indicating Exporter Filed Shipment and "F" indicating Forwarder Filed Shipment.
Filing Option Type	The description indicating the type of filing option chosen by the filer for the commodity shipment transaction. Possible values include: "Non AES," "2-Pre-departure," "3-Advanced Export Information (Partial)," and "4-Post-departure." Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Filing Option Type Code	A 1 digit code indicating the type of filing option chosen by the filer for the commodity shipment transaction. Possible values include: "Non AES" indicating Non AES, "Type-2" indicating 2-Pre-departure, "Type-3" indicating 3-Advanced Export Information (Partial), and "Type-4" indicating 4-Post-departure. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.

Trade Export Data Objects

Object Name	Object Description
Foreign Port of Unlading	The port code indicating the foreign port in which export cargo is to be unlade. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Foreign Trade Zone ID	The identity of the Foreign Trade Zone (FTZ) from which the merchandise was withdrawn on a particular Electronic Export Information (EEI) filing.
Forwarding Agent Address Line 1	The first address line of the mailing address of the forwarding agent. The freight forwarder/authorized agent is the person in the United States who is authorized by the principal party in interest (PPI) to facilitate the movement of the cargo from the United States to the foreign destination and/or prepare and file the required documentation. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Forwarding Agent Address Line 2	The second address line of the mailing address of the forwarding agent. The freight forwarder/authorized agent is the person in the United States who is authorized by the principal party in interest (PPI) to facilitate the movement of the cargo from the United States to the foreign destination and/or prepare and file the required documentation. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Forwarding Agent City	The city associated with the mailing address of the freight forwarder. The freight forwarder/authorized agent is the person in the United States who is authorized by the principal party in interest to facilitate the movement of the cargo from the United States to the foreign destination and/or prepare and file the required documentation. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Forwarding Agent Contact Name	The first and last name (Last, First) of the individual listed as the point of contact for the forwarding agent. The freight forwarder/authorized agent is the person in the United States who is authorized by the principal party in interest (PPI) to facilitate the movement of the cargo from the United States to the foreign destination and/or prepare and file the required documentation. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Forwarding Agent Contact Phone	The phone number of the individual listed as the point of contact for the forwarding agent. The freight forwarder/authorized agent is the person in the United States who is authorized by the principal party in interest (PPI) to facilitate the movement of the cargo from the United States to the foreign destination and/or prepare and file the required documentation. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.

Trade Export Data Objects

Object Name	Object Description
Forwarding Agent ID Number	The identification number (excluding any special characters such as hyphens "-") of the forwarding agent. The freight forwarder/authorized agent is the person in the United States who is authorized by the principal party in interest (PPI) to facilitate the movement of the cargo from the United States to the foreign destination and/or prepare and file the required documentation. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Forwarding Agent ID Type	The description indicating the identification type of the forwarding agent. Possible values include: "DUNS," "SSN," "EIN," and "Foreign Entity." Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Forwarding Agent ID Type Code	A 1 character code indicating the identification type of the forwarding agent. Possible values include: "D" indicating DUNS, "S" indicating SSN, "E" indicating EIN, and "T" indicating Foreign Entity. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Forwarding Agent Name	The company or enterprise name of the forwarding agent. The freight forwarder/authorized agent is the person in the United States who is authorized by the principal party in interest (PPI) to facilitate the movement of the cargo from the United States to the foreign destination and/or prepare and file the required documentation. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Forwarding Agent State	The 2 character code used to identify the state associated with the mailing address of the forwarding agent. The freight forwarder/authorized agent is the person in the United States who is authorized by the principal party in interest (PPI) to facilitate the movement of the cargo from the United States to the foreign destination and/or prepare and file the required documentation. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Forwarding Agent Zip Code	The zip code associated with the mailing address of the forwarding agent. The freight forwarder/authorized agent is the person in the United States who is authorized by the principal party in interest (PPI) to facilitate the movement of the cargo from the United States to the foreign destination and/or prepare and file the required documentation. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Hazmat Indicator	A 1 character code indicating whether or not a particular Electronic Export Information (EEI) filing contains hazardous materials. Possible values include: "Y" indicating Yes, "N" indicating No, and "U" indicating Unknown. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.

Trade Export Data Objects

Object Name	Object Description
HTS/Schedule B Description	The description associated with the U.S. Census Bureau (Schedule B number) or the U.S. International Trade Commission (HTS number). Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
HTS/Schedule B Number	The identification number of the commodity as classified by the U.S. Census Bureau (Schedule B number) or the U.S. International Trade Commission (HTS number) for a commodity reported on a particular commodity line item of an Electronic Export Information (EEI) filing.
Import Entry Number	The import entry number for a shipment transported under bond, or the import entry number when an FTZ NAFTA Deferred Duty claim is made Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Inbond Type Code	A 2 digit code indicating whether a particular shipment is being transported under bond. Possible values include: "36" indicating WAREHOUSE WITHDRAWAL FOR IE, "37" indicating WAREHOUSE WITHDRAWAL FOR T AND E, "67" indicating FOREIGN TRADE ZONE WITHDRAWAL FOR IE, "68" indicating FOREIGN TRADE ZONE WITHDRAWAL FOR T AND E, and "70" indicating MERCHANDISE NOT SHIPPED INBOND. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Intermediate Consignee Address Line 1	The first address line of the mailing address of the intermediate consignee on a particular shipment. The intermediate consignee is the person or entity in the foreign country that acts as an agent for the principal party in interest with the purpose of effecting delivery of items to the ultimate consignee. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Intermediate Consignee Address Line 2	The second address line of the mailing address of the intermediate consignee on a particular shipment. The intermediate consignee is the person or entity in the foreign country that acts as an agent for the principal party in interest with the purpose of effecting delivery of items to the ultimate consignee. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Intermediate Consignee City	The city associated with the mailing address of the intermediate consignee on a particular shipment. The intermediate consignee is the person or entity in the foreign country that acts as an agent for the principal party in interest with the purpose of effecting delivery of items to the ultimate consignee. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.

Trade Export Data Objects

Object Name	Object Description
Intermediate Consignee Contact Name	The first and last name (Last, First) of the individual listed as the point of contact for the intermediate consignee on a particular shipment. The intermediate consignee is the person or entity in the foreign country that acts as an agent for the principal party in interest with the purpose of effecting delivery of items to the ultimate consignee. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Intermediate Consignee Contact Phone	The phone number of the individual listed as the point of contact for the intermediate consignee on a particular shipment. The intermediate consignee is the person or entity in the foreign country that acts as an agent for the principal party in interest with the purpose of effecting delivery of items to the ultimate consignee. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Intermediate Consignee Country	The country associated with the mailing address of the intermediate consignee on a particular shipment. The intermediate consignee is the person or entity in the foreign country that acts as an agent for the principal party in interest with the purpose of effecting delivery of items to the ultimate consignee. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Intermediate Consignee ID Number	The identification number (excluding any special characters such as hyphens "-") of the intermediate consignee on a particular shipment. The intermediate consignee is the person or entity in the foreign country that acts as an agent for the principal party in interest with the purpose of effecting delivery of items to the ultimate consignee. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Intermediate Consignee ID Type	The description indicating the identification type of the intermediate consignee. Possible values include: "DUNS," "SSN," "EIN," and "Foreign Entity." Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Intermediate Consignee ID Type Code	A 1 character code indicating the identification type of the intermediate consignee. Possible values include: "D" indicating DUNS, "S" indicating SSN, "E" indicating EIN, and "T" indicating Foreign Entity. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Intermediate Consignee Name	The company or enterprise name of the intermediate consignee on a particular shipment. The intermediate consignee is the person or entity in the foreign country that acts as an agent for the principal party in interest with the purpose of effecting delivery of items to the ultimate consignee. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.

Trade Export Data Objects

Object Name	Object Description
Intermediate Consignee State	The 2 character code used to identify the state associated with the mailing address of the intermediate consignee on a particular shipment. The intermediate consignee is the person or entity in the foreign country that acts as an agent for the principal party in interest with the purpose of effecting delivery of items to the ultimate consignee. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Intermediate Consignee Zip Code	The zip code associated with the mailing address of the intermediate consignee on a particular shipment. The intermediate consignee is the person or entity in the foreign country that acts as an agent for the principal party in interest with the purpose of effecting delivery of items to the ultimate consignee. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
ITN	The unique internal transaction number (ITN) associated with a particular shipment.
Last AES Action Code	The most recent AES action requested on a particular shipment submitted on an Electronic Export Information (EEI) filing. Possible values include: "A" indicating Add, "R" indicating Replace, "C" indicating Change, "X" indicating Cancel, and "U" indicating Unknown. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Late File Indicator	A 1 character code indicating whether or not a particular Electronic Export Information (EEI) filing was a late filing. Possible values include: "Y" indicating Yes, "N" indicating No, and "U" indicating Unknown. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
License Type Code	A 3 character alphanumeric code indicating the type of export license, export permit, license exemption, license exception or other export authorization being claimed on a particular commodity line item of an Electronic Export Information (EEI) filing. Possible values include, but are not limited to: "S00" indicating LICENSE EXEMPTION CITATION, "S05" indicating DSP-5, "SAG" indicating AGREEMENTS, and "SCA" indicating STATE CANADIAN ITAR EXEMPTION. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
License Value	The license value reported for a license when present on a particular commodity line item of an Electronic Export Information (EEI) filing. The license value is the value designated on the export license that corresponds to the commodity being exported. This is required for all shipments that contain licensed goods (Section 30.6(b)(15)). Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.

Trade Export Data Objects

Object Name	Object Description
Mode of Transportation	The description indicating the mode of transportation by which the merchandise is exported. Possible values include, but are not limited to: "10-VESSEL, NON-CONTAINERIZED," "11-VESSEL, CONTAINERIZED," "20-RAIL," "21-RAIL, CONTAINERIZED," "30-TRUCK," and "31-TRUCK, CONTAINERIZED." Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Mode of Transportation Code	A 2 digit code indicating the mode of transportation by which the merchandise is exported. Possible values include, but are not limited to: "10" indicating 10-VESSEL, NON-CONTAINERIZED, "11" indicating 11-VESSEL, CONTAINERIZED, "20" indicating 20-RAIL, "21" indicating 21-RAIL, CONTAINERIZED, "30" indicating 30-TRUCK, and "31" indicating 31-TRUCK, CONTAINERIZED. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Origin of Goods	The description indicating whether or not merchandise on a particular commodity line item of an Electronic Export Information (EEI) filing was of domestic or foreign origin. Possible values include: "Domestic," "Foreign," and "Unknown." Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Origin of Goods D/F Indicator	A 1 character code indicating whether or not merchandise on a particular commodity line item of an Electronic Export Information (EEI) filing was of domestic origin. Possible values include: "D" indicating Domestic, "F" indicating Foreign, and "U" indicating Unknown.
Port of Export Code	The 4 digit code that represents the district and port where the shipment was exported from. The district code is the first 2 characters and the port code is the last 2 characters. Possible values include, but are not limited to: "2704" indicating LOS ANGELES, CA, "2506" indicating OTAY MESA, "2605" indicating PHOENIX, AZ, "3001" indicating SEATTLE, WA, and "4601" indicating NEW YORK/NEWARK AREA. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Previous Month End	The date object that can be added to a report query filter, which will enable a saved report to always return data for the previous month. This date object is designed to be used in conjunction with "Previous Month Start" when setting a date range for a given query. These two data objects will create a date range that will enable the query to always return data from the previous month's start through the last day of the previous month. This eliminates the need to filter by specific dates each time a saved report is run. Date objects allow reports to display continually updated data that matches variable dates or date ranges.
Previous Month Start	The date object that can be added to a report query filter, which will enable a saved report to always return data for the previous month. This date object is designed to be used in conjunction with "Previous Month End" when setting a date range for a given query. These two data objects will create a date range that will enable the query to always return data from the previous month's start through the last day of the previous month. This eliminates the need to filter by specific dates each time a saved report is run. Date objects allow reports to display continually updated data that matches variable dates or date ranges.

Object Name	Object Description
Previous Quarter End	The date object that can be added to a report query filter, which will enable a saved report to always return data for the previous quarter. This date object is designed to be used in conjunction with "Previous Quarter Start" when setting a date range for a given query. These two data objects will create a date range that will enable the query to always return data from the previous quarter's start through the last day of the previous quarter. This eliminates the need to filter by specific dates each time a saved report is run. Date objects allow reports to display continually updated data that matches variable dates or date ranges.
Previous Quarter Start	The date object that can be added to a report query filter, which will enable a saved report to always return data for the previous quarter. This date object is designed to be used in conjunction with "Previous Quarter End" when setting a date range for a given query. These two data objects will create a date range that will enable the query to always return data from the previous quarter's start through the last day of the previous quarter. This eliminates the need to filter by specific dates each time a saved report is run. Date objects allow reports to display continually updated data that matches variable dates or date ranges.
Previous Year End	The date object that can be added to a report query filter, which will enable a saved report to always return data for the previous year. This date object is designed to be used in conjunction with "Previous Year Start" when setting a date range for a given query. These two data objects will create a date range that will enable the query to always return data from the previous year's start through the last day of the previous year. This eliminates the need to filter by specific dates each time a saved report is run. Date objects allow reports to display continually updated data that matches variable dates or date ranges.
Previous Year Start	The date object that can be added to a report query filter, which will enable a saved report to always return data for the previous year. This date object is designed to be used in conjunction with "Previous Year End" when setting a date range for a given query. These two data objects will create a date range that will enable the query to always return data from the previous year's start through the last day of the previous year. This eliminates the need to filter by specific dates each time a saved report is run. Date objects allow reports to display continually updated data that matches variable dates or date ranges.
Quantity 1	The quantity reported in conjunction with the unit of measure (UOM) on a particular commodity line item of a shipment.
Quantity 2	The second quantity reported (if applicable) in conjunction with the unit of measure (UOM) on a particular commodity line item of a shipment.
Related Company Indicator	A 1 character code indicating that, during the fiscal year, the United States principal party in interest (USPPI) or foreign ultimate consignee reported on an Electronic Export Information (EEI) filing owned 10% or more of the other's voting securities. Possible values include: "Y" indicating Yes, "N" indicating No, and "U" indicating Unknown. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Routed Transaction Indicator	A 1 character code indicating whether the foreign principal party in interest (FPPI) on a particular Electronic Export Information (EEI) filing authorized a U.S. forwarding or other agent to facilitate the export of the merchandise from the U.S. Possible values include: "Y" indicating Yes, "N" indicating No, and "U" indicating Unknown.

Trade Export Data Objects

Object Name	Object Description
Seal Number	The number corresponding to the Customs and Border Protection seal on a shipping container, if used on a shipment. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Self-Filer Indicator	A 1 character code indicating whether or not a particular filer is a self-filer. Possible values are "Y" indicating Yes and "N" indicating No. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Shipment Value	The total value of a particular shipment. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Shipment Weight (KG)	The total weight in KG of a particular shipment. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Sold En Route Indicator	A 1 character code indicating whether or not a particular Electronic Export Information (EEI) filing claimed that the consignee was unknown at the time of shipping. Possible values include: "Y" indicating Yes, "N" indicating No, and "U" indicating Unknown. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Today	The date object that can be added to a report query filter, which will enable a saved report to always return data for the current day. This eliminates the need to filter by specific dates each time a saved report is run. Date objects allow reports to display continually updated data that matches variable dates or date ranges.
Transmitter ID Number	Identifier of the party transmitting the data on a particular Electronic Export Information (EEI) filing. This may be the same party reported as the Filer ID Number (USPPI, Forwarder, or Data Entry Center) or it can be a third party service center or port authority. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Transportation Reference Number	A reservation/booking number on a particular Electronic Export Information (EEI) filing, assigned by the carrier to hold space on the carrier for cargo being shipped. It is the booking number for vessel shipments, the master air waybill number for air shipments, the bill of lading number for rail shipments, and the freight or pro bill for truck shipments. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
U.S. State of Origin	The U.S. state, U.S. territory or U.S. possession where the merchandise began its journey to the port of exportation.

Trade Export Data Objects

Object Name	Object Description
Ultimate Consignee Address Line 1	The first address line of the mailing address of the ultimate consignee on a particular shipment. The ultimate consignee is the person, party or designee that is located abroad and actually receives the export shipment. This may be the end-user or the Foreign Principal Party in Interest (FPPI). Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Ultimate Consignee Address Line 2	The second address line of the mailing address of the ultimate consignee on a particular shipment. The ultimate consignee is the person, party or designee that is located abroad and actually receives the export shipment. This may be the end-user or the Foreign Principal Party in Interest (FPPI). Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Ultimate Consignee City	The city associated with the mailing address of the ultimate consignee on a particular shipment. The ultimate consignee is the person, party or designee that is located abroad and actually receives the export shipment. This may be the end-user or the Foreign Principal Party in Interest (FPPI). Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Ultimate Consignee Contact Name	The first and last name (Last, First) of the individual listed as the point of contact for the ultimate consignee on a particular shipment. The ultimate consignee is the person, party or designee that is located abroad and actually receives the export shipment. This may be the end-user or the Foreign Principal Party in Interest (FPPI). Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Ultimate Consignee Contact Phone	The phone number of the individual listed as the point of contact for the ultimate consignee on a particular shipment. The ultimate consignee is the person, party or designee that is located abroad and actually receives the export shipment. This may be the end-user or the Foreign Principal Party in Interest (FPPI). Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Ultimate Consignee Country	The country associated with the mailing address of the ultimate consignee on a particular shipment. The ultimate consignee is the person, party or designee that is located abroad and actually receives the export shipment. This may be the end-user or the Foreign Principal Party in Interest (FPPI). Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Ultimate Consignee ID Number	The identification number (excluding any special characters such as hyphens "-") of the ultimate consignee on a particular shipment. The ultimate consignee is the person, party or designee that is located abroad and actually receives the export shipment. This may be the end-user or the Foreign Principal Party in Interest (FPPI). Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.

Trade Export Data Objects

Object Name	Object Description
Ultimate Consignee ID Type	The description indicating the identification type of the ultimate consignee. Possible values include: "DUNS," "SSN," "EIN," and "Foreign Entity." Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Ultimate Consignee ID Type Code	A 1 character code indicating the identification type of the ultimate consignee. Possible values include: "D" indicating DUNS, "S" indicating SSN, "E" indicating EIN, and "T" indicating Foreign Entity. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Ultimate Consignee State	The 2 character code used to identify the state associated with the mailing address of the ultimate consignee on a particular shipment. The ultimate consignee is the person, party or designee that is located abroad and actually receives the export shipment. This may be the end-user or the Foreign Principal Party in Interest (FPPI). Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Ultimate Consignee Type	The description indicating the party type of the ultimate consignee. Possible values include: "DIRECT CONSUMER," "GOVERNMENT ENTITY," "OTHER/UNKNOWN," and "RESELLER." Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Ultimate Consignee Type Code	A 1 digit code indicating the party type of the ultimate consignee. Possible values include: "D" indicating DIRECT CONSUMER, "G" indicating GOVERNMENT ENTITY, "O" indicating OTHER/UNKNOWN, and "R" indicating RESELLER. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Ultimate Consignee Zip Code	The zip code associated with the mailing address of the ultimate consignee on a particular shipment. The ultimate consignee is the person, party or designee that is located abroad and actually receives the export shipment. This may be the end-user or the Foreign Principal Party in Interest (FPPI). Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Unit of Measure Code (Quantity 1)	The unit of measure (UOM) that is reported in conjunction with the quantity on a particular line item of a shipment. Possible values include, but are not limited to: "DOZ" indicating Dozen, "KG" indicating 1,000 Grams, and "PCS" indicating Pieces. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Unit of Measure Code (Quantity 2)	The unit of measure (UOM) that is reported in conjunction with the second quantity (if applicable) on a particular line item of a shipment. Possible values include, but are not limited to: "DOZ" indicating Dozen, "KG" indicating 1,000 Grams, and "PCS" indicating Pieces. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.

Trade Export Data Objects

Object Name	Object Description
Used Vehicle Indicator	A 1 digit code indicating whether or not a particular commodity line item on an Electronic Export Information (EEI) filing contains a used vehicle. Possible values are: "Y" indicating Yes and "N" indicating No. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
USPPI Address Line 1	The first address line of the mailing address of the U.S. Principal Party in Interest (USPPI) on a particular shipment. The USPPI is the person or entity in the United States that receives the primary benefit, monetary or otherwise, from the export transaction.
USPPI Address Line 2	The second address line of the mailing address of the U.S. Principal Party in Interest (USPPI) on a particular shipment. The USPPI is the person or entity in the United States that receives the primary benefit, monetary or otherwise, from the export transaction.
USPPI City	The city associated with the mailing address of the U.S. Principal Party in Interest (USPPI) on a particular shipment. The USPPI is the person or entity in the United States that receives the primary benefit, monetary or otherwise, from the export transaction.
USPPI Contact Name	The first and last name (Last, First) of the individual listed as the point of contact for the U.S. Principal Party in Interest (USPPI) on a particular shipment. The USPPI is the person or entity in the United States that receives the primary benefit, monetary or otherwise, from the export transaction. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
USPPI Contact Phone	The phone number of the individual listed as the point of contact for the U.S. Principal Party in Interest (USPPI) on a particular shipment. The USPPI is the person or entity in the United States that receives the primary benefit, monetary or otherwise, from the export transaction. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
USPPI Country	The country associated with the mailing address of the U.S. Principal Party in Interest (USPPI) on a particular shipment. The USPPI is the person or entity in the United States that receives the primary benefit, monetary or otherwise, from the export transaction. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
USPPI EIN	The 9 digit Employer Identification Number (EIN) number (excluding any special characters such as hyphens "-") for the U.S. Principal Party in Interest (USPPI) on a particular shipment. The USPPI is the person or entity in the United States that receives the primary benefit, monetary or otherwise, from the export transaction.
USPPI ID Number	The identification number (excluding any special characters such as hyphens "-") of the U.S. Principal Party in Interest (USPPI) on a particular shipment. The USPPI is the person or entity in the United States that receives the primary benefit, monetary or otherwise, from the export transaction.
USPPI ID Type	The description indicating the identification type of the United States Principal Party in Interest (USPPI). Possible values include: "DUNS," "SSN," "EIN," and "Foreign Entity." Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.

Trade Export Data Objects

Object Name	Object Description
USPPI ID Type Code	A 1 character code indicating the identification type of the United States Principal Party in Interest (USPPI). Possible values include: "D" indicating DUNS, "S" indicating SSN, "E" indicating EIN, and "T" indicating Foreign Entity. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
USPPI Name	The company or enterprise name of the U.S. Principal Party in Interest (USPPI) on a particular shipment. The USPPI is the person or entity in the United States that receives the primary benefit, monetary or otherwise, from the export transaction.
USPPI State	The 2 character code used to identify the state associated with the mailing address of the U.S. Principal Party in Interest (USPPI) on a particular shipment. The USPPI is the person or entity in the United States that receives the primary benefit, monetary or otherwise, from the export transaction.
USPPI Zip Code	The zip code associated with the mailing address of the U.S. Principal Party in Interest (USPPI) on a particular shipment. The USPPI is the person or entity in the United States that receives the primary benefit, monetary or otherwise, from the export transaction.
Vehicle ID Type	The description indicating whether the line deals with a Vehicle Identification Number (VIN) or a Product ID. Possible values are: "Product ID" and "VIN." Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Vehicle ID Type Code	A 1 character code indicating whether the line deals with a Vehicle Identification Number (VIN) or a Product ID. Possible values are: "P" indicating Product ID and "V" indicating VIN. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Vehicle Title Number	For a particular line, this object will return either: the serial number for a vehicle reported with a Product ID, or the title number for a vehicle reported with a Vehicle Identification Number (VIN). Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
Vehicle Title State	The 2 character abbreviation of the state in which the vehicle title was issued. Possible values include, but are not limited to: "MA" indicating Massachusetts, "CA" indicating California, and "NY" indicating New York. Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
VIN/Product ID	The identification of the reported used vehicle or product. This can either be the Product ID or the Vehicle Identification Number (VIN). Note: When running a report from the perspective of the USPPI, this object will display a blank (null) value for all routed transactions that are agent-filed, reflecting the limited information supplied by the USPPI at the time of filing.
